After Effects

Moovly

Why should we use Templates?

Saves development time

Significantly reduces development cost

Increase flexibility

Easy to use

Provide consistency

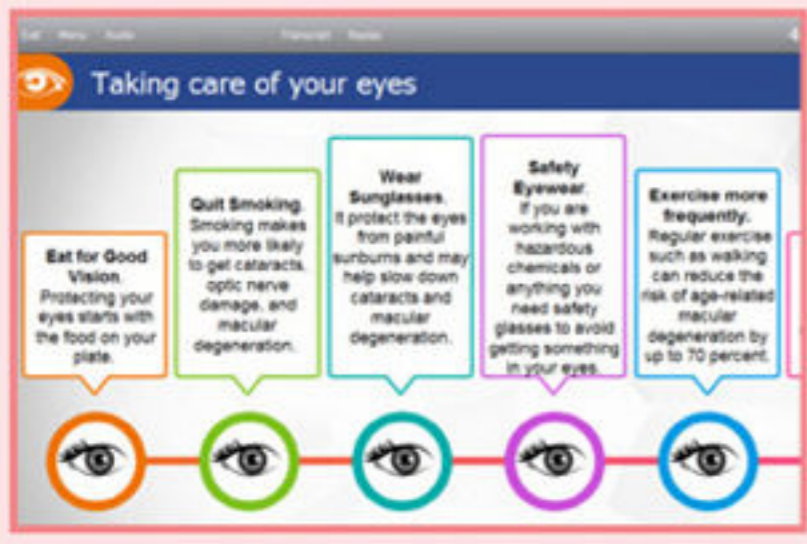

Provides opportunities of interaction and engagement

Minimizes errors/issues

Hexalearn Samples

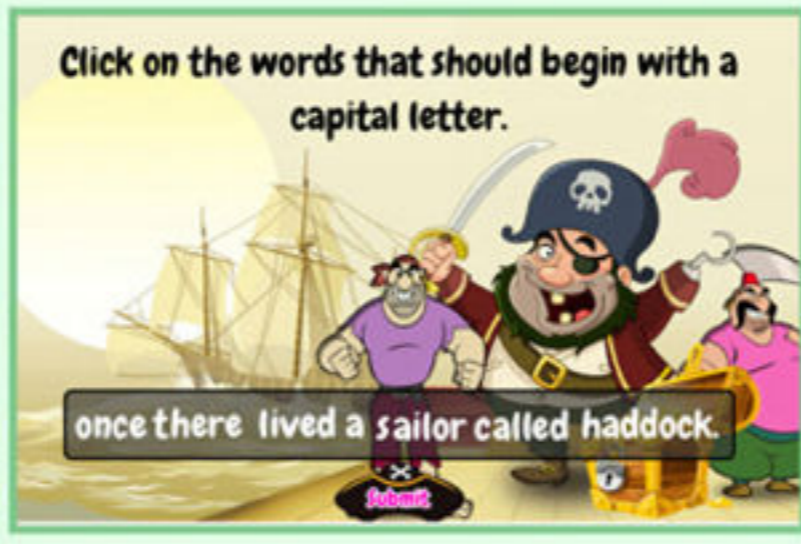

Claro
work together, better

Claro is a web-based e-Learning and m-Learning authoring and publishing software designed Tool.

Cp

Captivate is a rapid responsive authoring tool that is used for creating e-Learning contents. For example responsive design software simulations, branched scenarios, and randomized quizzes in Small Web Formats (.swf) and HTML5 formats.

a

Storyline is a authoring tool that is used for creating e-Learning contents. It has Interface similar to that of PowerPoint, the pictured characters have flexible settings, free form and drag & drop questions, software simulation, variables and triggers, free mobile app for viewing content on iPads and Android devices.

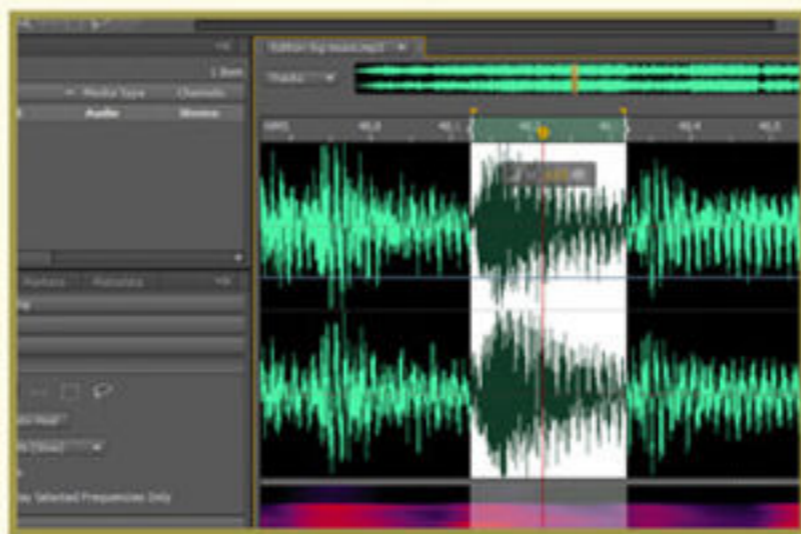

Lectora
Inspire

Lectora is used to create online training courses, assessments, and presentations. It is also used for the conversion of Microsoft PowerPoint presentations into e-Learning content.

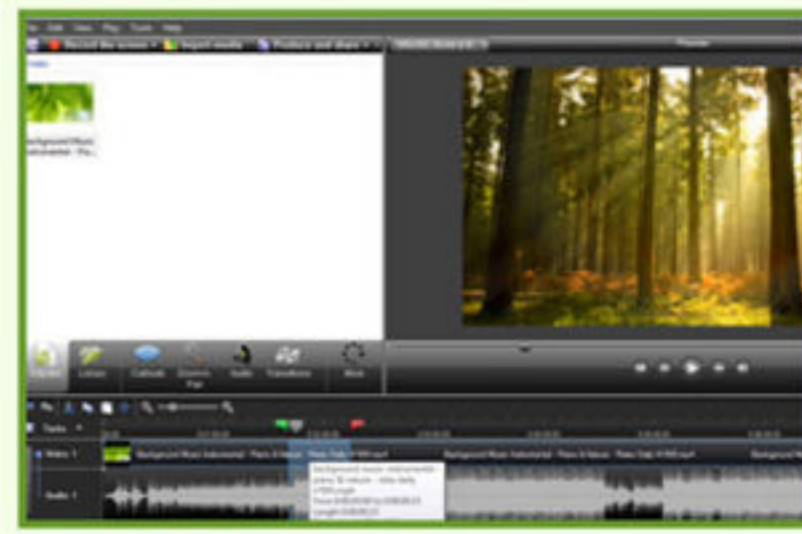

Sb

Soundbooth is used to edit, normalize and crop the existing audios as per requirement.

C

Camtasia Studio is used to do basic video editing, record your screen, animate visual properties, working with callouts, Produce and share your video and etc.

Ps

Photoshop is used to edit, and create graphics.

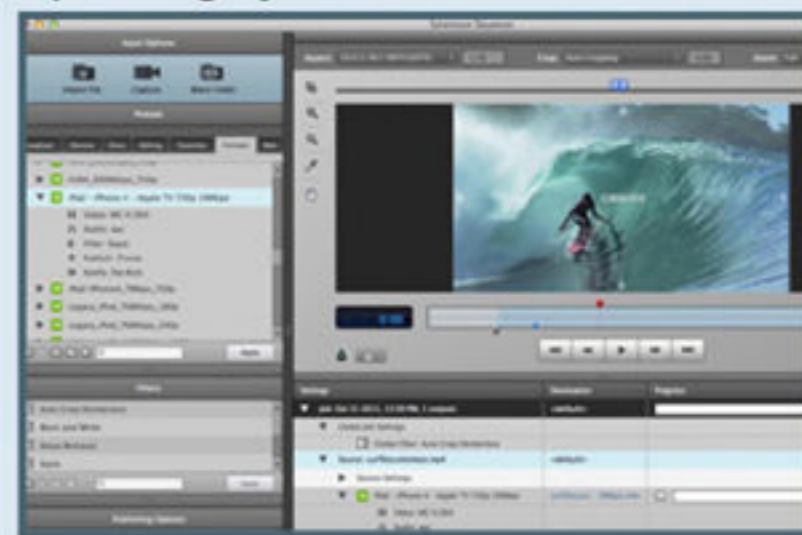

spine

Spine is used to create 2D animations. Specifically for software and game development.

Sorenson

Sorenson squeeze is a video encoding tool. By using this tool you can compress and Convert video and audio files on Mac OS X or Window operating systems.
